

Free eaga ShowerSmart

As part of the Government's commitment to reduce the amount of energy we use, eaga, working with the Government and energy suppliers, have a free eaga ShowerSmart available to selected homes which we believe are eligible. These products are free of charge so that the Government and energy suppliers can continue working towards their important energy saving targets.

- The eaga ShowerSmart is suitable for all non-electric showers and regulates the flow rate of a shower to 7.8 litres per minute – the equivalent of a powerful electric shower
- For mains-pressure showers (where hot water comes from a combi-boiler or similar), this saves both water and the associated energy with heating hot water.
- For a 2-person household, the eaga ShowerSmart will typically save more than 12,000 litres per year*, cut carbon emissions by 1 tonne* of CO2 over its lifetime and save about £20* on gas and £20* on water bills (where metered) per year.

For the average family, this would equate to savings of about £30 off their gas bills and over £30 off their water bills (where metered) per year.

All you have to do is complete your details online and they will sent it to you. <http://www.eaga.com/showersmart/> or ring the Free phone number 0800 953 0033 and quote reference SS RF
